

ATTENTION GUN OWNERS

EU and Irish civil servants are currently finalising new restrictions on the use of lead in shooting and fishing. Politicians and parliaments are not involved in this EU comitology procedure in any way.

The Irish Government is allowing this to proceed, with no infrastructure in place, and with no proper assessment on the issue conducted.

There is no alternative Ammunition for small rifles (under .223mm).

Furthermore, the alternative ammunition proposed under these new restrictions will not be suitable or safe for 70-80% of shotguns.

Over 100,000 guns will become obsolete – fit only for scrapping. Farmers and owners of older guns will be most affected by this new restriction.

For more information visit www.NARGC.ie

Act now or we will finish up with another unnecessary, and unwarranted restriction from Europe. Raise this with your politicians, they must be held accountable. This type of bureaucratic dictate has no place in Ireland or in any democracy.
